# WHAT IS BUSD TOKEN?

Binance USD (BUSD) is a new USD-denominated stablecoin approved by the New York State Department of Financial Services (NYDFS) that will be launched in partnership with Paxos and Binance.

BUSD remains one of the few regulated crypto tokens out there on the market and its partnership with Paxos, a trusted name in the crypto space, implies a dedication to building a genuinely secure and regulated token for the crypto space.

# ABOUT ROYAL STAGE

## 100% Automatic

No Human  
Control.

## 100% Transparency

Every Transaction  
can be verify.

## No Edit & Switch Option

Rules & Plans  
Can't  
Be Changed.

## 100% Decentralized

No Admin,  
No Owner,  
No Backoffice.

## Peer to Peer

Peer To Peer  
Transaction  
Via Smart  
Contract

## Decentralized

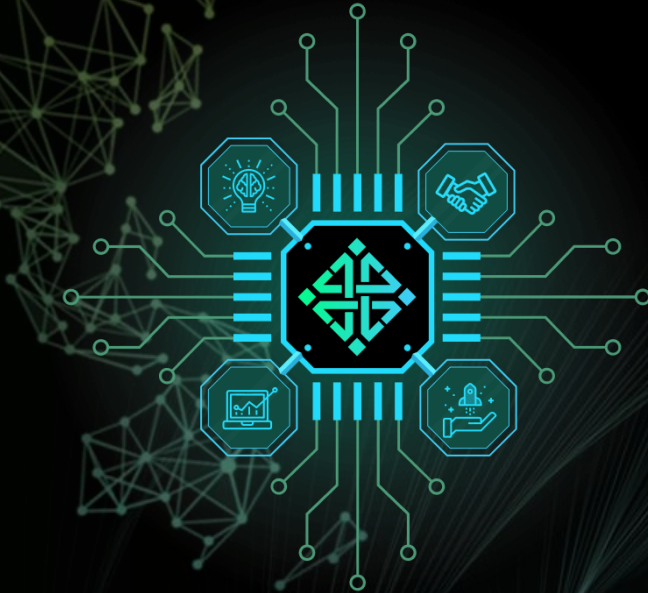

Anybody Can  
do with a  
smartphone,  
laptop /PC.

# DECENTRALIZATION

What does “Decentralized” mean? What are the advantages and benefits? Smart Contracts, like crypt a currencies, are decentralized they work strictly according to the underlying program, without the possibility of subsequently changing the defined execution. The code that contains all the logic of the contract expiration is on the blockchain and all calculations are provided by millions of computer around the world. This ensures that there is no risk of hacking into the smart contract and stopping the project.

Decentralized marketing is created with an automated contract that offers you maximum security and sustainability. A smart contract is an automatic execution algorithm. Its exists within the “BUSD BLOCKCHAIN”, the number one cryptographic currency among those with which smart contracts ca be created\* the blockchain is an immutable record of transactions and information, which is cryptographically.

# SMART CONTRACT

This is a new phenomenon of the modern decentralized economy allows, in accordance with the program code, process and distribute financial flows of digital assets.

All processes take place in an open, decentralized blockchain network.

# BINANCE SMART CHAIN

Binance Smart Chain (BSC) is best described as a blockchain that runs in parallel to the Binance Chain. Unlike Binance Chain, BSC boosts smart contract functionality and compatibility with the Ethereum Virtual Machine (EVM). The design goal here was to leave the high throughput of Binance Chain intact while introducing smart contracts into its ecosystem.

# TYPES OF BUSINESS PLAN

- ❖ The System follows the principal of 2 By 10 Byradical matrix.
- ❖ The System follows the principal of 4 By 2 Hybrid matrix global autopool.
- ❖ The Entries are placed from top to bottom, Left to Right in a Sequential manner in multiples of 2.
- ❖ This is a just 10 level structure and to have maximum achievement from this structure we have for the first time in the world.

# Business Plan
